### Section 6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures	: Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in sections 7 and 8.
Environmental precautions	Do not allow contact with soil, surface or ground water.
Methods and materials for containment and cleaning up	Eliminate all ignition sources if safe to do so. Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Flush away traces with water. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

# SAFETY DATA SHEET

## Peracid Plus 15%

Toxicity to daphnia and other aquatic invertebrates	:	Peroxyacetic acid 48 h EC50: 0.73 mg/l
Toxic to algae	:	Peroxyacetic acid 72 h EC50: 0.7 mg/l Hydrogen peroxide 72 h EC50: 1.38 mg/l
Persistence and degradability	:	The fate of peracetic in water will be influenced by abiotic degradation, which yields acetic acid and oxygen, and hydrolysis, which forms acetic acid and hydrogen peroxide, both of which are easily biodegradable compounds.
Bioaccumulative potential	:	Based on its low octanol-water partition coefficient and its rapid degradation in the environment, this product is not bioaccumuable.
Mobility in soil	:	Peracetic acid released in the environment will partition almost exclusively (>99%) to the water compartment. Only a minor part (<1%) will remain in the atmosphere, where it is expected to undergo rapid decomposition with a half life of 22 minutes. The fate of peracetic acid in the environment is mainly determined by its degradation.
Other adverse effects	:	
Remarks	:	-Toxic to aquatic organisms -Hazard for the environment is limited due to product properties: considerable abiotic and biotic degradability, weak persistence of degradation products. -Does not bioaccumulate

<b>Section 13. Disposal Considerations</b>
