

BWT

Boiler Water Treatment

BWT is specifically designed for the preventative maintenance of industrial-grade boilers of 50hp and below. BWT will help control water pH and hardness, thus preventing scale build-up. Oxygen scavenging sulfites will work for your boiler to prevent harmful oxygen pitting, helping to increase boiler efficiency.

Features & Benefits

- One-Shot treatment for ease of use
- Can help increase down-line machinery efficiency
- May help increase boiler life

NOTE: Using BWT in older boilers where treatment has not been used before is not recommended; may result in excessive scale discharge which may clog steam lines.

Available Sizes

Product ID	Container Size
142953	4x1 Gallon Case
142959	5 Gallon Pail
142965	15 Gallon Drum

Product Information

Product Line: Laundry

Category: Specialty

Matter: Liquid

Color: Clear

Scent: n/a

pH: 7 - 8
