

SULTRASPOT MINERAL

Pre-wash and post-wash stain remover for removing glue, paint, tar, ballpen ink

Application

- **SULTRASPOT MINERAL** is a solvent-based product for removing stains from garments.

Properties

- The following stains can be removed with **SULTRASPOT MINERAL**: glue, paint, grease, ballpen ink, lipstick, etc.
- **SULTRASPOT MINERAL** can be used safely on almost all fabrics

Use instructions

- For best results, apply **SULTRASPOT MINERAL** undiluted to the stain before cleaning.
- Gently work in the product with a scrubbing brush (do not rub!), so that the product has time to work. If may be necessary to first soften dried-on stains by kneading the stain by hand.
- Rinse out the stain with a stain-remover gun and water.
- If the stain is still visible, repeat the procedure – if necessary, multiple times.
- Blow the stain dry with compressed air and clean the garment in the cleaning machine with the usual cleaning program for the garment.
- Because **SULTRASPOT MINERAL** is a concentrated product, it is important to take care with sensitive (bright) colours such as red, blue, brown and green. In addition, take care with linen fibres as these can very easily lose colour. In case of doubt, first test on a hem.

Physico-chemical properties

- Density : 0,96
- pH (100%) : 7,4
- Flash point : 70°C
- Solubility in water : emulsifiable

Composition & Safety

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Storage

Use above 5°C. Store above 0°C

Packaging

6 x 500 ml Case
